I hereby certify that this correspondence is being deposited with the U.S. Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, U.S. Patent and Trademark Office, Alexandria, VA 22313-1450 on April 14, 2005.

Douglas S. Glantz Reg. No. 29,640
Date of Signature: April 13, 2005

Commissioner of Patents
U.S. Patent and Trademark Office
Alexandria, VA 22313-1450
Sir:

RECEIVED
MAY 11 2005
TC 1700

THIRD UNANSWERED STATUS INQUIRY

Applicant requests the status of the above-identified patent application.

Two prior formal status inquiries have been submitted and remain unanswered, (1) on November 9, 2004 (mailed November 3, 2004) and (2) on January 31, 2005 (mailed January 27, 2005). No answer has been received from the USPTO in either formal status inquiries, (1) filed November 9, 2004 and (2) filed again on January 31, 2005.

Enclosed is a copy of the postcard acknowledgments of receipt, marked EXHIBIT A, as received back stamped (1) on November 9, 2004 and (2) on January 31, 2005 by the USPTO.

Serial No.: 09/473,246
Group Art Unit: 1756

The Correspondence Address for this patent application should be as follows - CUSTOMER NUMBER 23774.

Douglas Glantz
Attorney At Law
5260 Deborah Court
Doylestown, PA 18901

A copy of the Associate Power of Attorney and New Correspondence Address filed on January 13, 2004 is enclosed, marked as EXHIBIT B.

Applicants have not received a reply to the formal status inquiry filed November 9, 2004 or the formal status inquiry filed January 31, 2005.

The PAIR file history does not show a formal status inquiry filed November 9, 2004 or January 31, 2005.

However, the PAIR file history shows the case now has been transferred to the Technology Center 1700 as of January 18, 2005, 2 pp. Enclosed is a copy of the PAIR file history as of April 13, 2005, marked as EXHIBIT C.

A telephone call was made to the Inventors Branch at the USPTO on April 12, 2005. A second telephone call to the Technology Center 1700 was also made on April 12, 2005 with a request for a status update. No new information was received.

After the termination of the U.S. Patent Interference No. 105,176, the present Application USSN 09/473,246 should have been returned to Examiner Angebranndt in Art Unit 1756 for further prosecution, and Claims 1-4, as amended, and 7-25 should be the

Serial No.: 09/473,246
Group Art Unit: 1756

subject of a Notice of Allowability.

Claims 27 and 28 corresponded to and were subject to Count 1, the sole Count, of U.S. Patent Interference 105,176.

Claims 1-4 and 7-25 stood on their own and did not correspond to Count 1, the sole Count, of U.S. Patent Interference 105,176.

U.S. Patent Interference No. 105,176 was terminated on August 31, 2004 by judgment in respect to Claims 27 and 28.

Upon termination of the U.S. Patent Interference No. 105,176, the present Application USSN 09/473,246 should be returned to the Examiner for further prosecution in respect to Claims 1-4 and 7-25.

In telephone Interview Summary record, Paper No. 17, mailed December 10, 2002, the Examiner recognized the declarations of Paper No. 6 filed on August 24, 2001 as sufficient to obviate the rejections of Claims 3, 5, 6, and 9-25 based on the prior art as embodiments corresponding to the provision of a coating to nickel to form a hardened surface and which embodiments are not claimed in the Mentz et al. U.S. Patent No. 6,017,657.

In an Amendment filed under Certificate of Mailing on January 6, 2003, Applicants thanked the Examiner for his thoughtful comments and assistance in the telephone interview and the indication that the declarations in Paper No. 6 obviate the rejections of Claims 3, 5, 6, and 9-25. An amended Claim 1 was

Serial No.: 09/473,246
Group Art Unit: 1756

presented in the Amendment filed under Certificate of Mailing on January 6, 2003 to incorporate the limitations of Claims 5 and 6 into Claim 1, as amended, and revise the numerical limitations respecting the depth of the etched pattern and the surface hardness of the die. The Amendment recited that support for the 2-3 micron depth of the etched pattern can be found on page 6, lines 26-29, of Applicants' specification, and support for the 110-125 kg/mm² surface hardness of the die (before coating thereof) is found on page 9, lines 17-20, of the specification.

New Claims 27 and 28 were presented in the Amendment filed under Certificate of Mailing on January 6, 2003 and placed the instant Schaefer et al. application in condition for an interference to be declared with certain claims in Mentz et al. 6,017,657. Claim 27 was substantially identical to original Claim 1 as filed in the present Schaefer et al. application except for correction of a typographical error (changed "o" to "of" in line 5) and incorporation of original Claim 7 therein as suggested by Examiner Angebranndt. Claim 28 was identical to original Claim 1 as filed except for the correction of the typographic error.

Now, upon the termination of the U.S. Patent Interference No. 105,176, the present Application USSN 09/473,246 should be returned to Examiner Angebranndt in Art Unit 1756 for further prosecution, and Claims 1-4, as amended, and 7-25 should be the

Serial No.: 09/473,246
Group Art Unit: 1756

subject of a Notice of Allowability.

Applicants respectfully request the status of the instant Application USSN 09/473,246 which is believed to be returned to Examiner Angebrannndt for further prosecution and completion of the Examiner's prior determination in respect to Claims 1-4 and 7-25, which Claims are not subject to the judgment as to Count 1, the sole Count, of the terminated Interference.

For the foregoing reasons and now upon termination of the Interference No. 105,176, Applicants respectfully request the status of the instant U.S. Patent Application USSN 09/473,246 which is understood to be properly returned to Examiner Angebrannndt in Art Unit 1756 for further prosecution and completion of the Examiner's prior determination in respect to Claims 1-4, as amended, and 7-25, which Claims were not subject to the judgment on Count 1, the sole Count, of the Interference which is now terminated.

Reconsideration of this application is requested.

Respectfully submitted,

April 13, 2005
